

Senior Medical Officer

This position description is designed to give an overview of the type of work and performance required for this role and may include other duties as required.

Who we are as an organisation and what we are about

Everything we do is related to our **vision and purpose** – *a safe and secure aviation system - so people are safe and feel safe, when they fly.*

We will have the following **impacts**:

Being safe – fewer people die or sustain injury while participating in the aviation system.

Feeling safe – people’s choice to participate in the aviation system is not limited by perception of unsafe practices.

Our **pathways** to achieve this are:

Leadership and influence – through regulatory leadership we influence a safe and secure civil aviation system for New Zealand.

Active regulatory stewardship – we monitor and care for the civil aviation regulatory system through our policy and operational activities.

Professional regulatory practice – we act to identify risk and reduce it through intelligence-led intervention.

Scope

Reports to: Team Leader Medical
Principal Medical Officer (dotted line- professional medical oversight)

Group: Aviation Safety

Location: National Office, Wellington

Role Overview

The Senior Aviation Medical Officer role includes responsibilities for the setting, maintenance and monitoring of aviation medical standards, practices and procedures and related duties within the aviation industry. Some of the key functions include assessing medical reports submitted in respect of applicants for flight crew and air traffic services licenses and acting as medical experts under the Civil Aviation Act flexibility process.
